

FOR CONTRACTORS

RRP Refresher Requirements

The EPA has proposed a rule that would amend the RRP refresher training requirements to eliminate the hands-on requirement in the refresher training. The proposed rule is expected to be adopted by the end of 2015, and will potentially eliminate the need to travel to classes for the hands-on training, making it more time- and cost-effective to maintain your RRP Certification. While the proposed rule change is being considered, the EPA has extended the re-certification deadline.

Effective April 16, 2015, the following re-certification deadlines are in effect:

Date course completed	Expiration
On or before March 31, 2010	March 31, 2016
From April 1, 2010 to March 31, 2011	6 years from the date of course completion
On or after April 1, 2011	5 years from the date of course completion
